

PROFESSIONAL SUMMARY

Motivated Software Developer and BSIT graduate with experience in web development and application design. Passionate about creating functional, user-friendly, and secure solutions while continuously improving technical and problem-solving skills.

WORK HISTORY

02/03/2026 - 04/23/2026 **IT Technical Support Intern and Developer**

PENRO Marinduque - Bangbangalon, Boac, Marinduque, Philippines

- Assisted in the development and maintenance of the PENRO Marinduque Billing and Collection System (PMBCS).
- Provided technical support to employees by troubleshooting and resolving computer, printer, and software-related issues.
- Participated in the installation and configuration of UniFi networking equipment to improve internet connectivity and network performance.
- Assisted in configuring and maintaining internet connections across office workstations.
- Supported the installation, cabling, maintenance, and monitoring of CCTV systems.
- Created Audio-Visual Presentations (AVPs) for monthly reports and organizational activities.
- Performed routine hardware and software maintenance to ensure the reliability of office IT infrastructure.

11/15/2024 - 03/15/2025 **Part-Time Data Encoder / E-Commerce Assistant**

Freelance | Remote

- Encoded and maintained product information and inventory data using Google Sheets and Microsoft Excel.
- Conducted product research and data analysis for Amazon listings.
- Utilized Keepa and other e-commerce tools to analyze product price history, sales trends, and market performance.
- Organized and updated product records to ensure data accuracy and consistency.

PROJECT HISTORY

02/27/2025 - 12/09/2025 **SwineGuard Web-based Health Monitoring and Vaccination Tracking System**

Technologies: HTML, JavaScript, Node.js, Express.js, MongoDB

Role: Full-Stack Developer

- Developed backend functionalities and integrated APIs to support system operations and data management.
- Designed and implemented the database structure, ensuring efficient storage and retrieval of information.
- Created the system architecture and system design documentation to support scalability and maintainability.
- Designed user interfaces and prototypes using Figma to improve user experience and workflow.
- Developed responsive frontend interfaces using HTML, CSS, and JavaScript.
- Implemented features for swine health monitoring, vaccination tracking, appointment management, inventory management, and expense recording.
- Conducted system testing, including functionality, usability, and integration testing, to ensure system reliability and performance.
- Collaborated throughout the development lifecycle, from requirements analysis and design to implementation and testing.

02/03/2026 - 04/23/2026

PENRO Marinduque Billing and Collection System (PMBCS)

Technologies: Laravel, JavaScript, PHP, Bootstrap, MySQL, XAMPP

Role: Full-Stack Developer

- Developed and maintained a web-based Billing and Collection System for PENRO Marinduque.
- Designed and implemented database structures using MySQL to ensure efficient data management.
- Developed backend functionalities using Laravel and PHP, including data processing, validation, and business logic.
- Built responsive and user-friendly interfaces using Bootstrap, HTML, CSS, and JavaScript.
- Implemented CRUD operations, authentication, and reporting features to support daily office operations.
- Integrated frontend and backend components to provide a seamless user experience.
- Performed system testing, debugging, and maintenance to ensure reliability and performance.
- Participated in system deployment and user support during the implementation phase.

SKILLS

- Frontend Development: HTML, CSS, JavaScript, Bootstrap
- Backend Development: PHP, Node.js, Express.js
- Frameworks: Laravel
- Database Management: MySQL, MongoDB
- UI/UX Design: Figma, Mockplus
- Application Development: Java
- Version Control: Git, GitHub
- Responsive Web Design
- RESTful API Development and Integration
- Database Design and System Architecture
- Software Testing and Debugging
